A Model of Pure Economics from Althusser to Sirohi (2021-4)
By Louis Althusser

Introduction
By Shomit Sirohi

It is difficult to read Althusser, in fact as arcane a task as reading Michelet or Malebranche, imagine he means by shops and this fairly Sirohian idea of modelling into semiotics, something more like its opposite in fact, shops are white swans, and black swans, which overlap and develop into a pure line of flight – something like a line of flight which is lignes de fluit and such companies Sirohi imagines with his lovers. He means imagine Sirohi working on his website, and convert that to a theological idea of small cheap old computers, all lined up and converted (I say in Althusserian form converted), to in fact the idea of companies which work on cheap ideas of social networking as the new Microsoft app, a simple old website which has a game on it and radio connected to Deterior.

All of this is fantasy in Lacan's sense – that it can happen or will, we are though in Sirohi, a subject, not fantasy, we cannot fantasy the economy, we just imagine it is all already there – with Jewish and Parsi and Islamic subjects – they nowadays think in simple terms – like a line of flight is free, and that is why history becomes an prophecy – that in fact we can develop the future – my prophecy Louis Althusser means is this.

I. Economics as Lived –

_____Shops_____

_____Cinema Halls

____Architecture_____

_____Creative Elements____

II. Imagine this as in Sirohi – Semiotic Operator

Model this into semiosis, I imagine it means, we are creative, and can model semiotic operators such as film images, and such ideas, like Godard's cinema, and even say advertisments, and even semiosis which I define is –

A. Definition – Semiosis is the process of linguistic abstraction in the economic flows of investments.

B. Axiom – I imagine this to be practiced as financial profit.

C. Postulate – it belongs to experience, lived experience.

I imagine lived experience develops such ideas – statistics indicates the wealth of an individual – that he listens to jazz inspires jazz style clothing, that he listens to women develops Elle Magazine, that he is on a car with Blaupunkt develops car models.
